Best Est. ROI WINTER 2025
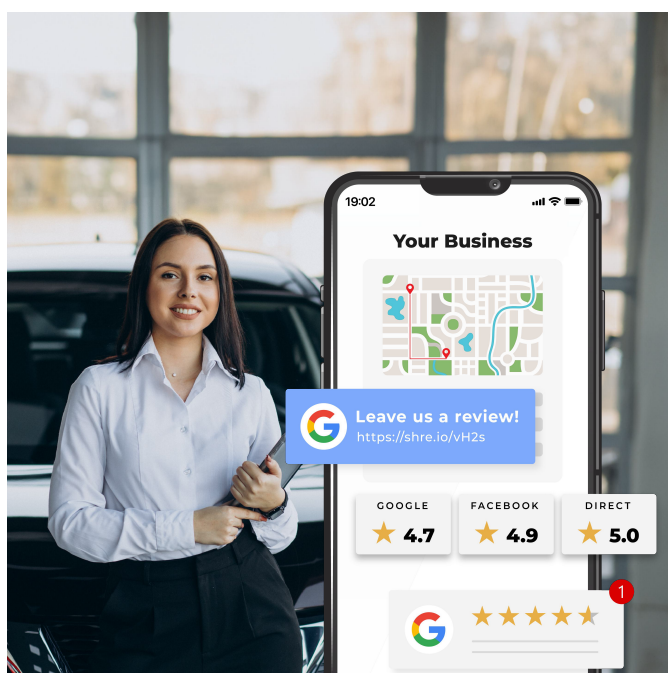

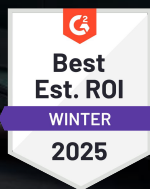

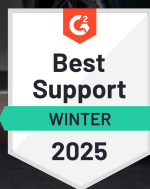

REPUTATION MANAGEMENT

DemandHub's AI platform grows dealership reputations by automatically collecting authentic customer reviews across multiple sites after each sale or service. At the same time, its AI review responder saves time by generating and posting tailored replies based on pre-approved templates. Dealers can also choose to personalize responses or use the "Generate AI Reply" feature for quick, custom drafts—eliminating the need to manage reviews manually while boosting reputation organically.

POWERFUL WEBSITE WIDGETS

DemandHub's Web Chat makes it effortless for visitors to connect with your dealership directly from your website and continue the conversation via SMS. It captures leads instantly and sends them to your team in real time. Paired with our interactive Website Review Widget, you can showcase only your best customer reviews right on your site, building trust and reducing the chance that shoppers explore competitors. Together, these widgets turn your website into a lead-converting, reputation-building powerhouse.
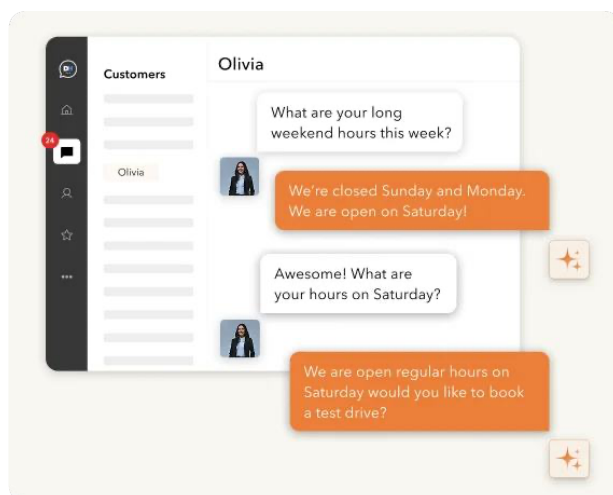

SMART LEAD MANAGEMENT

DemandHub's Lead Manager centralizes leads from 100+ car listing sources into one organized inbox, automatically assigns them to sales reps via round-robin with custom timing rules, and ensures you reply quickly with personalized messaging. It integrates with your CRM/DMS so lead info flows in seamlessly, gives you analytics to spot your strongest lead channels, and helps you move prospects from first contact to appointment in record time—so fewer lost leads, faster conversions.
